What crafts do we support?

We are really excited to hear about the amazing craft being made in Manchester.

If you don't see the materials you work in or the craft you make currently represented at the Centre please do get in touch, we're always keen to expand and to hear new ideas.

Unfortunately, we can't support studios working in some fine art practices as our priority is craft and design. We use our artist policy to help us make decisions on studio recruitment. We can share this with you.

If you would like to talk to us about your craft, please get in touch and we can have a chat!

Studio Sharing Opportunities

Many of our studio residents are looking for makers to share their studios. It's a great way to become part of the Craft Centre Community, and build your business in an established retail environment.

Space to make and sell your work in one of our established studios

Flexible options for part time working

Learn from our established makers

A great way to develop your creative practice without the commitment to a full time studio.

Interested?

If you're interested in our studio or sharing opportunities, please send a brief introduction to your business along with 6 images of work to contactus@craftanddesign.com.

We will then get in touch with more information on furthering your application.

We look forward to hearing from you soon!

If you have any questions, please get in touch!
